

XPCAMPER EXPLORE MORE!

The XPCube was designed for overland adventurers who know what they want to drive. An industry first - the Cube is crafted with a seamless, frameless composite shell and can be sized and applied to your choice of chassis. XPCamper incorporates appliances and electronics from the marine industry ensuring durability and service at practically any marina worldwide.

COMFORT AND MORE

The Cube's interior offers a surprisingly large amount of living space in a small area. The intelligent use of space and large, bright windows allow the interior to feel larger than it looks. Enjoy ample

headroom, a queen-sized bed with Froli mattress system, full galley services and a roomy dinette. Under-bed storage provides plenty of room for your clothes, there's overhead cabinet storage, additional space under the dinette seat, and loads of storage under the floor.
